

Puja App — Product Report (End-to-End)

1. Vision

A one-stop spiritual companion app: tells users what's special about each day, what puja to do (personalized by zodiac/rashi), how to do it, and connects them to everything needed — kits, priests, catering, travel, and prasad — with audio/video guidance in regional languages, for all ages.

2. Core Modules

A. Daily Panchang & Calendar

- Full calendar view (month/day). Tap any date to see:
- What's special about that day (tithi, nakshatra, festival, if any)
- Sunrise, sunset, and auspicious muhurat windows for puja
- Rahu kaal / inauspicious periods to avoid
- **Zodiac-personalized daily view:** user enters birth details once; app shows "what's good for you today" based on rashi — which puja, which activity, which color/direction is favorable
- Daily audio briefing (short voice note) — "today's special + your zodiac guidance" — playable with one tap, good for elderly/children
- Push notification each morning with the day's summary

B. Puja Vidhi (How-To) Library

- Step-by-step procedure for every puja, festival-wise and occasion-wise (housewarming, new vehicle, Satyanarayan Puja, etc.)
- Best time to start (linked to panchang engine)
- Audio narration of the full procedure (for following along hands-free)
- Video demonstrations
- Mantras and aartis — full audio clips, with text/transliteration for reading along
- Katha (story) narration for each festival — audio + simple animated/illustrated version for kids

C. Kids & Next-Generation Section

- Simplified, illustrated explanation of each festival: why it's celebrated, its story, its importance
- Age-appropriate audio/video content
- Small quizzes/activities to keep children engaged
- Goal: make the app something a grandparent and a child can use together

D. Vrat (Fasting) Guide

- Which vrat falls when, rules (what to eat/avoid), how to break the fast, associated puja
- Reminders leading up to vrat days

E. Zodiac / Rashi Engine

- "What should I do today according to my rashi?"
- "What puja should I do for [X] according to my rashi?"
- Daily/weekly personalized recommendations, not just generic horoscope

F. Prasad Guide

- Festival-wise prasad recipes with step-by-step audio/video
 - Option to order prasad-only (no full puja) for delivery
-

3. Marketplace & Booking Services

A. Puja Kits

- Ready-made kits per festival/occasion (e.g., full Satyanarayan Puja kit with itemized list) — buy directly in-app

B. Priest (Pandit) Booking

- Priest directory with profiles, specialization, ratings, language spoken, availability
- In-app booking, scheduling, payment

C. Catering Services

- Book catering for puja/ceremony, festival-specific menus

D. Band / Ceremonial Services

- Book bands or ceremonial services for functions

E. Travel & Pilgrimage Booking

- Temple travel packages (e.g., Yadagirigutta, Tirupati, etc.)
- Ticket booking, darshan slots
- Room/accommodation booking near temples
- Bundled packages: travel + stay + darshan tickets

F. Combined Service Selection

- For any puja, user can pick any combination: kit only / kit + priest / kit + priest + catering / full package — flexible add-ons

4. Content Format Requirements

- Audio clips: mantras, aartis, full puja narration, katha, daily briefing
- Video: puja how-to, prasad-making demos
- Text: transliteration + meaning, for readers who prefer text
- Multilingual support strongly recommended (Hindi, Telugu, and other regional languages, plus English)

5. Suggested Additions (not mentioned by you, but likely needed)

1. **User profile with birth chart** (date, time, place of birth) — powers all zodiac personalization accurately
2. **Payment gateway** integration for kits, bookings, travel, catering
3. **Vendor/priest onboarding panel** — separate flow for priests, caterers, kit sellers to list themselves, get verified, and manage bookings
4. **Reviews & ratings** for priests, caterers, kits, travel packages
5. **Location-based matching** — show priests/caterers/services near the user
6. **Live streaming** — option to livestream a puja for family members who can't attend
7. **Offline mode** — download audio/video for use without internet (important for pujas at homes with poor connectivity)
8. **Reminders/notifications** — festival countdowns, vrat reminders, "book your priest before it's fully booked" alerts
9. **Donation feature** — donate to temples directly through the app
10. **Gifting** — send a puja kit or prasad booking as a gift to family
11. **Community/social layer** — share puja photos, festival greetings
12. **Accessibility** — large text mode, audio-first navigation for elderly users
13. **Admin/backend dashboard** — for managing content, vendors, bookings, and payments

6. Suggested Module Priority (for MVP)

1. Panchang + Calendar + Zodiac daily guidance
2. Puja Vidhi library with audio/video + mantras
3. Kids/festival-importance content
4. Priest booking + Puja kits (start with 2-3 popular pujas, e.g., Satyanarayan Puja, Griha Pravesh, Vehicle Puja)
5. Prasad ordering
6. Catering, band, travel/temple booking (phase 2, since these need vendor networks)

7. Monetization Ideas

- Commission on kit sales, priest bookings, catering, travel bookings
- Premium subscription for ad-free experience, offline downloads, personalized daily zodiac reports
- Featured/sponsored listings for priests and vendors

This report captures everything discussed, organized into buildable modules, with additions flagged separately in Section 5 for your review.
